

## A RESPONSIVE SUPPLY CHAIN FOR BETTER PATIENT OUTCOMES

*In the healthcare industry, an efficient supply chain is the differentiator in meeting rigorous standards for positive patient outcomes. With constant changes in regulations, increases in patients, advancements in technology, and growing demands, having a responsive supply chain that delivers integrated solutions with end-to-end visibility can lower the total cost to serve and support better patient care.*

The healthcare industry is experiencing tremendous pressure to reduce costs, while increasing customer service levels. However, inefficient supply chains and transportation networks are challenging integrated delivery networks and manufacturers. From the lack of inventory space at a final destination to same day, next day delivery, meeting the complex challenges of the industry begins with an efficient supply chain.

As demand in the healthcare industry rises, and delivery methods of care change, having an integrated solution from a single source provider can give you the end-to-end visibility you need, while lowering costs and helping you provide better patient care.

Ryder is the only supply chain provider that offers a unique suite of services that include fleet leasing & maintenance, distribution management, and dedicated transportation solutions. With more than 250 supply chain engineers, LEAN expertise, and experience in transportation, we are your one-stop shop for all your supply chain needs.

---

### The Outsourcing Difference:

After contracting us for their supply chain and transportation needs, our healthcare customers achieved:

- \$5.2 million saved via LEAN implementation
  - 99% on-time delivery on same day, next day orders
  - More than \$1 million in annual cost savings from supply chain re-design
  - 99.96% inventory accuracy
  - Improved flexibility and speed to market to meet increased patient demand
-

## Why Ryder?

By creating a closed-loop system between suppliers, manufacturers, healthcare systems, and patients, Ryder's full-suite of services help reduce inventory levels, increase order accuracy, and improve order cycle times, resulting in lower costs while improving speed-to-patient. Ryder has the prescription to lower costs and align you with better patient care.

At Ryder, we have the experience to help you with every step of your medical supply chain. We don't treat our customer solutions as a one-size fits all operation, we tailor our solutions around you. If your supply chain needs it, Ryder has it.

Our LEAN approach to managing warehouses helps you eliminate waste, shorten lead times, and improve overall quality. You will also benefit from our services that support all of your distribution management needs, like staff hiring and training, inventory management, packaging, value-added services, reverse logistics, and co-located warehouse facilities.

With Ryder, you get improved visibility and control of your supply chain. With up-to-the-minute intelligence, you can make adjustments to deliveries, view in-transit inventory, and deliver the right service levels. This gives you reduced cycle times, inventory, and costs.

As fulfillment expectations grow in complexity, our dedicated transportation solution and transportation management connect your product distribution and transportation to better serve end-users. This integrated solution allows you to optimize your network, enhance patient outcomes, and increase sustainability.

With a trusted supply chain manager you can fulfill orders faster, drive growth, and focus on what matters most – your customers and patients. Discover how outsourcing with us can improve your fleet management and supply chain performance at [ryder.com](http://ryder.com).
